Documentation Updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for recent updates or to verify that you are using the most recent edition of a document, go to: **https://softwaresupport.hp.com**

This site requires that you register for an HPE Passport and sign in. To register for an HPE Passport ID, go to: **https://hpp12.passport.hpe.com/hppcf/createuser.do**

Or click the **the Register** link at the top of the HPE Software Support page.

You will also receive updated or new editions if you subscribe to the appropriate product support service. Contact your HPE sales representative for details.

Support

Visit the HPE Software Support Online web site at: **https://support.hpe.com/**

This web site provides contact information and details about the products, services, and support that HPE Software offers.

HPE Software online support provides customer self-solve capabilities. It provides a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the support web site to:

- Search for knowledge documents of interest
- Submit and track support cases and enhancement requests
- Download software patches
- Manage support contracts
- Look up HPE support contacts
- Review information about available services
- Enter into discussions with other software customers
- Research and register for software training

Most of the support areas require that you register as an HPE Passport user and sign in. Many also require a support contract. To register for an HPE Passport ID, go to:

 https://cf.passport.hpe.com/hppcf/createuser.do

HPE Software Solutions Now accesses the HPSW Solution and Integration Portal Web site. This site enables you to explore HPE Product Solutions to meet your business needs, includes a full list of Integrations between HPE Products, as well as a listing of ITIL Processes. The URL for this Web site is **https://www.hpe.com/us/en/solutions.html**

Contents

Requirements

This section provides information about the supported hardware and software that you must have in order to successfully install and run Autopass License Server 9.14.

Hardware

Autopass License Server 9.14 is supported on the following hardware:

- Minimum 1.6 Ghz processor
- A minimum of 4 GB RAM
- A minimum of 300 MB of hard drive space (1 GB is recommended for optimal operation of the Autopass License Server
- High Color (16-bit), Graphics card with 64 MB video memory
- HTTPS Protocol enabled
- Port 5814 accessible

Operating System

Autopass License Server 9.14 runs on the following operating systems both on physical servers and on virtual machines. Support for Operating Systems that has reached their EOL(End-Of-Life) and are no longer receiving security patches will be removed from this list below.

64-bit AutoPass:

- Windows 10
- Windows Server 2012 R2
- Windows Server 2016
- Red Hat Enterprise Linux 7 and 8
- CentOS 7 and 8

LDAP Directory Servers

If you use LDAP to provide user and user group data for the AutoPass, you can use one of the following LDAP servers with the Autopass License Server 9.14:

- Enterprise LDAP Server
- Microsoft Active Directory Server

> **Note:** You can use any LDAP server that supports LDAP v3. However, the servers listed above have been certified for compatibility with Autopass License Server 9.14.

For details on using LDAP with the AutoPass, see the H*PE Autopass License Server User Guide*, found on the installation directory.

Web Browsers and Plug-ins

One of the following supported web browsers is required to run Autopass License Server 9.14:

- Mozilla Firefox 39
- Internet Explorer 11
- Google Chrome 40

Compatability

This section provides information about software and configurations that are not required, but which are compatible with Autopass License Server 9.14.

HPE Software Coexistence

The 32 bit Autopass License Server 9.14 can be installed on the same system with all HPE Products.

The 64 bit Autopass License Server 9.14 can be installed on the same system as all HPE products except Unified Functional Testing and Sprinter.

Other Software Coexistence

Autopass License Server 9.14 can be run in conjunction with all third-party software, provided that the software does not use server port **5814**.
